Since our founding in 1994, MOONS’ has grown to become a leading manufacturer of integrated motion control products, intelligent lighting products, and intelligent management systems for large plant equipment. We are dedicated to providing our customers with system-level total solutions, that continually pursue innovation and quality.

Headquartered in Shanghai, MOONS’ has offices in ten major cities in China such as Beijing, Guangzhou and Shenzhen. The company’s overseas sales network includes offices in America, Europe, Japan and Southeast Asia. MOONS’ also has R&D centers and manufacturing bases in North America and Europe, and the total number of employees now exceeds 3,000 worldwide.

Stock Code 603728

On May 9th, 2017, MOONS’ was listed on the Shanghai Stock Exchange (Stock code: 603728). MOONS’ entered the capital market in order to meet new opportunities and challenges. This is reflected in our concept of “moving in better ways”. All members of MOONS’ are encouraged to continually upgrade our collective values, strive for excellence in the process of doing business, improve expertise, and gain better opportunities.

Mr. James Chang, founder and president of the company, says the company name “MOONS” came from his inspiration by chance. It emphasizes the spirit of teamwork on the basis of personal innovation. MOONS’, with its unique form of plural possessive case, is intended to communicate that the honor of MOONS’ belongs to every member of the team.

“Moving in Better Ways” is our slogan. We are an ambitious company and never step our on-going accelerated pace to improve processes and increase efficiency. Through scientific management methodologies, and tools that incorporate advanced technology with management employees, we constantly optimize management processes that enable MOONS’ to maintain on-going growth in competitive markets.

About AMP and LIN Acquisition

The acquisition of AMP and Lin Engineering allowed MOONS® to expand into a comprehensive provider of control motors and drives. It is also an important step for further participating in the North America market.

With leading technologies of stepper motor drives and integrated intelligent step-servo control, AMP has advantages in markets such as industrial automation and medical/life sciences. LIN Engineering has important market share and application advantages in the biotechnology, high-end security equipment, aerospace and other high-end fields, especially in North America. AMP and LIN Engineering are parts of a team that support each other's technology, talent, innovation and markets. They also help to attract the world's top customers in North America, and further expand the company's markets including factory automation, medical equipment, high-end security equipment, aerospace equipment, etc.

About Yunkon Acquisition

Yunkon Electronic, founded in 1999, who used to be the second biggest stepper motor manufacturer in China, is also an expert in motor manufacturing. The acquisition has benefits for production layout, expands market competition, maximizes the synergy of acquisitions, and ultimately brings greater economic returns for the company.

About Technosoft Acquisition

After the acquisition of Technosoft Motion, MOONS® now owns an operation unit that integrates R&D, manufacturing and marketing in Europe, together with MOONS® Europe (Italy) and AMP & MOONS® (Germany) which focus more on sales. The regional operation center is a key part for MOONS® to implement its global “Smart Micro Motion” strategy. And the acquisition also presents that MOONS® has completed the construction of operation networks in the main industrial areas around the world, including China, Northeast Asia, North America and Europe, laying a solid foundation for a healthy, balanced development of its business in the global market.
MOONS’ has set up ten offices in China, as well as subsidiaries in other countries including the United States, Italy, Singapore, Japan and Germany. Our business covers major countries and regions in North America, Europe, East Asia and Southeast Asia, with dealers all over the world.
MOONS' GLOBAL E-COMMERCE

MOONS’ Global E-commerce is an extension of MOONS’ global sales and technical support network. Based on the global business development concept of "Global Selling, Global Buying", MOONS' Global E-commerce is dedicated to becoming a one-stop direct provider of products for both motion control and intelligent lighting. It gathers high-performance, high-quality and distinctive products from various application segments, and fully integrates our online and offline resources. MOONS' Global E-commerce—Experts' Choice for Innovation!

Positioning of Products and Services

MOONS’ Global E-commerce - with its high-performance, high-quality and distinctive standard products as well as professional services - can meet the demanding requirements of global engineers and original equipment manufacturers. MOONS’ offers advice on product performance, rapid delivery, and technical support for projects in all development and application stages such as concept, R&D, and prototype.

Target Customers Groups

MOONS’ R&D Engineers, Global Professional Makers

Product positioning

High Performance, High- Quality, and Unique Features

Service Positioning

In-stock Supply, Expert Technical Support, Rapid Response

With online technical support, order quantity as low as one piece (no MOQ limit), separate packaging, and exclusive delivery by global air express, MOONS’ E-commerce provides better service to engineers and professional makers around the world. MOONS’ E-commerce will also help professional customers globally to successfully develop and produce more high-performance innovative products in a quicker and better way.

Platform

MOONS’ Global E-commerce platform currently has multiple sites in English/Japanese/Chinese supporting both PCs and mobile phones. MOONS’ welcomes users from all over the world to visit our sites from anywhere at any time.

Motion Control Products and Solutions

MOONS® has been in the hybrid stepper motor business for more than 20 years, and is now a leader in hybrid stepper R&D, motor driving technologies as well as manufacturer technologies. MOONS® has grown to where it is now one of the largest global manufacturers of stepper motors, and related motion control products including: high quality stepper motors, BLDC motors, servo motors, slotless BLDC motors, linear motors, motor drives and actuators.

Applications

- Medical Devices
- Professional Printer
- 3D Printer
- Textile Machinery
- Packaging Equipment
- Banking Equipment
- Intelligent Stage Lighting
- Solar Control Systems
- Robotics
- Security Systems
- Automotive
- Vending
- Telecom
- Pump and Vane
- Aerospace

Motors

- Hybrid stepper motors / Permanent magnet stepper motors
- BLDC motors
- Super Low Detent Torque motors / Vacuum motors

Lin Engineering obtains NSF-ISR issued AS 9100D certificate, that meets Aerospace Industry special requirement.

Remarkable successful cases

- Reaching Outer-Space (FAST)
- Up to Space (Satellite)
- The UP Sky (Loen)
- In the Sky (Aviation)
- On the Tower (3G, 4G&5G)
- Ride on Vehicle (Auto, Mobile)
- On the ground (Satellite ground)
- At the Sea (Maritime)
Motion Control Products and Solutions

Through independent R&D and advanced technologies from around the world, MOONS™ now produces many products with excellent performance, safety, and reliability. These include stepper motors and drives, step-servo motors and drives, servo motors and drives, brushless motors and drives. By bringing in advanced linear guide rails, lead screw production processes and patented technologies and combining them with our own motor and control technologies, we have developed and produced highly integrated linear motion products.

MOONS™ is committed to providing customers with more stable, intelligent, and convenient motion control solutions.

Applications

- FA
- Solar
- Robot
- Material Handling
- Lithium battery
- Intelligent OA
- Scientific Instrument
- Semiconductor
- 3C
- Tool

Motors and motor drives

- TSM Integrated Step-Servo Motors
- M3 Servo systems
- MDX Integrated Servo Motors
- STF Stepper Drives

Linear Motion Products

- Linear Stepper Motors
- Linear Slides
- Linear Actuators
LED Driver and Intelligent Lighting Control System

MOONS’ LED Driver and Intelligent Lighting Control System business started in January 2005. After more than 10 years of continuous development and innovation, MOONS has become a professional Hi-Tech manufacturing organization producing computer application technology, communication devices, intelligent control systems, drivers and system integration technology. MOONS’ LED lighting solutions are widely used in outdoor lighting, as well as industries and commercial fields.

We’re always committed to being a leading “Intelligent Control and Driver Solutions” supplier.

---

Applications

- Street Lighting
- Tunnel Lighting
- Human Centric Lighting
- Medical Lighting
- Automobile Lamp
- Landscape & Architecture Lighting
- Smart Building Lighting
- Other Particular Application

---

Products

- Intelligent Drivers
- Circular High Bay Drivers / Constant Power Drivers / Explosion Proof Power Drivers
- Intelligent Lighting Control Systems
- Motorized LED Lighting Solutions

---

Remarkable successful cases

- Hong Kong–Zhuhai–Macau Bridge (Hong Kong–entrance), China
- Apple Store, Shibuya, Japan
- Lanzhou Highway Tunnel, China
- 2018 Eiffel Tower Show, France
- Tel Aviv Street lighting, Israel
- Savannah Port, USA
Equipment Management
Total Solution

Entering into the equipment management business in 1996, MOONS® has been providing solutions to many of China’s top companies in power, metal, coal, petrotraction, automotive, tobacco and municipal infrastructure fields. With our outstanding hardware & software for equipment inspection and maintenance, together with our well-recognized expertise in equipment consultation and services, MOONS® supports our customers by significantly increasing equipment efficiency, extending service life, and reducing equipment downtime and spare parts inventory.

Applications

- Power industry
- Metallurgy industry
- Petrochemical industry
- Coal industry
- Automobile industry
- Tobacco industry
- Municipal industry

Products

- Dual Channel Vibration Analyzer
- Single Channel Vibration Inspector
- Wireless Vibration Monitoring System

Remarkable successful cases

- Circular Pump Monitoring – Magnesium Plant
- Compressor Monitoring – Oil Refinery Plant
- Hot Oil Pump Monitoring – Oil Refinery Plant
International Trade

MOONS’ International Trading (Shanghai) Co., Ltd was established in Shanghai Waigaoqiao Free Trade Zone in 1998. We specialize in the distribution of electronic parts and components such as relays, sensors, capacitors, switches, servo and frequency converters mainly with Panasonic brand, etc. With the rapid and steady development of the business, we have gradually started to introduce production equipment to Chinese customers since 2010. We are also selling Panasonic SMT and Plug-in machine in recent years.

MOONS’ International Trading (Shanghai) Co., Ltd has built long-term close cooperative relations with numerous well-known enterprises for more than 20 years. With our good customer relations and business reputation, and our experience and professional technical support services, we create greater value for our customers.

Applications

Electricity
Automotive
Home Appliances
Charging Piles
Illumination

Products

Power relays
DSP series
ST series
IX series
PhotoMOS
AQV series
AGV series
AQW series
Signal relays
TQ series
TX series
DO series
Electric Power Transmission
Capacitors
Conductive polymer capacitors
Film capacitors
Gold capacitors
Other Categories
Battery sensors
Storage cards

PCB relays
Plug-in relays
EV relays
PhotoMOS
Switches

Automotive

Servo Motors
Programmable Logic Controllers

Industrial Control

Sensors

With world class business management, MOONS’ is ready to be your reliable and strategic long-term partner. “Moving in Better Ways” is our company declaration. It symbolizes that MOONS’ is moving forward continuously on the road to the future.

No matter what you need, MOONS’ will figure it out with more accuracy, efficiency and energy-saving. No matter what dream you of, MOONS’ can help make it come true with the most intelligent and reliable method.
